

Meet the revolutionary new **head-worn, hands-free** electronic video magnifying device for people with macular degeneration and other serious vision impairments.

Meet the latest innovation for the visually impaired! NuEyes, is a head worn, hands-free device that will help you read, write and become more visually

independent! By utilizing the newest technology available, you can easily control the video magnifier by using only your voice, a wireless Bluetooth controller or by simply touching the glasses themselves. You can either read a book comfortably in your easy chair or use the included optional lens for viewing distance objects such as a loved one's face! NuEyes won the **2016 CTA Foundation Award** at the Consumer Electronics Show (CES) in Las Vegas.
